 - Education: economics in human resources bachelor's degree program
-
- we are looking for students who are interested in the diverse world of work, the diverse forms of employment opportunities and want to know how people work within organizations, companies and how to manage employees efficiently
 - during the training, we place great emphasis on promoting the acquisition of the theoretical curriculum with project work, training and various practical sessions
 - there is a high demand for skilled professionals everywhere, and qualified HR professionals are needed both in the public and in the private sector, but also in non-profit organizations, from small businesses to giant multinational companies, and even in the consulting world

- Training time: 7 semesters
- Training area: economics
- Work schedule: full-time training (in English) and correspondence training
- Form of financing the training: state scholarship or self-funded
- Education: bachelor of economics in business administration and management

- the programme is ranked among the Top-5 training according to the latest national accreditation test, which is also important because this training is advertised in most (more than 2 dozen) places in the country
- due to our wide-ranging corporate relationships, the participation of excellent external corporate leaders in the course is regular, so we help to deepen the practical application of theoretical economic knowledge
- in the campus of Gödöllő, in parallel with the Hungarian-language BAM programme, the programme is also operating with one of the largest
- numbers in Hungary, in purely English, students from more than 20 countries come from 4 continents, which, among other things, provides an
- excellent opportunity for our Hungarian students to build their international relations
